EXPERIENCE

Frontend Engineer

Spenny Fintech

Jun' 21 - Present

User Onboarding: Crafted animations and micro-interactions in onboarding and activation flows, resulting in 28% improvement.

App startup time: Reduced app startup time by 73% by fetching only critical API data in parallel with splash screen animation.

SMS Parser: Built a custom SMS listener background service which powered the most loved feature called "Roundups", resulting in a 33% increase in automatic investment orders.

Led the frontend team to ship both Android & iOS apps with features like Mini KYC, Wise (P2P lending investments), Goal based investing, Referral/Rewards etc.

Frontend Engineer Intern

Illuminus EdTech

Jun' 20 - Aug' 20

Delivered features like assignment manager, digital attendance portal and centralised online library to the platform used in 120 schools across 9 countries.

Worked on different data viz charts to give a bird eye view of a student's academic performance to parents and school management.
